

Puneeth Prakash

DevSecOps Engineer | Software Engineer

Bregenz, Vorarlberg, Austria • contact@puneeth.io • linkedin.com/in/ppuneeth • github.com/punitpi • typedbyme.puneeth.io

Summary

Software engineer with 8+ years of experience across DevSecOps, cloud-native architecture, and microservices. Currently building secure, observable engineering systems at OMICRON electronics. Works across C#, Node.js, AWS, and Azure — automating CI/CD workflows, hardening pipelines, and designing APIs and infrastructure that scale.

Technical Skills

Languages: C#, JavaScript (Node.js), Python, Bash, SQL, YAML

Cloud & IaC: AWS (EKS, Lambda, Fargate ECS, API Gateway, S3, DynamoDB), Azure (AKS, WebJobs), Terraform, CloudFormation

DevSecOps & CI/CD: GitHub Actions, Jenkins, Harness, Ansible, SonarQube, Black Duck, Docker, Kubernetes, Helm

Backend & Data: .NET, Express, Flask, React, Keycloak (OAuth2), Microsoft Graph API, MSSQL, MySQL, MongoDB, Redis

Experience

DevSecOps Engineer / Software Engineer

Dec 2025 – Present

OMICRON electronics

Klaus, Austria

- Designed and deployed a full observability platform on Azure Kubernetes Service (AKS) using the LGTM stack (Loki, Grafana, Tempo, Mimir).
- Built Azure infrastructure from scratch with Terraform, establishing reproducible environment provisioning.
- Packaged observability components into a custom umbrella Helm chart for repeatable, versioned deployments.
- Apply DevSecOps practices across cloud infrastructure security and CI/CD pipeline hardening.

Senior Software Engineer

Feb 2021 – Oct 2025

OneAdvanced

Bengaluru, India

- Architected cloud-native microservices using Node.js, AWS Lambda, and Kubernetes (EKS), deploying and maintaining production clusters.
- Built a secure middleware microservice on AWS Fargate ECS with OAuth2 authentication via Keycloak.
- Implemented end-to-end CI/CD pipelines using GitHub Actions, Harness, CloudFormation, and Terraform; designed reusable .NET Worker Services and Azure WebJobs for event-driven integrations.
- Resolved penetration-testing vulnerabilities and drove \$1,000+ monthly AWS cost savings through resource optimization.

Software Engineer

Mar 2018 – Feb 2021

OneAdvanced

Bengaluru, India

- Built a serverless customer portal on AWS Lambda, API Gateway, and S3, contributing React front-end components.
- Optimized SQL stored procedures for a 50% improvement in query performance; automated deployments via Jenkins CI/CD pipelines.

Test Engineer

Mar 2017 – Nov 2017

Samsung R&D Institute India

Bengaluru, India

- Authored and executed 600+ test cases for Project Bixby; managed test server deployments and analyzed Android crash reports via ADB/DDMS.

Projects

- LGTM Observability Stack** | *AKS, Terraform, Helm* — Production-grade observability platform on Azure Kubernetes Service, provisioned with Terraform and deployed via a custom umbrella Helm chart.
- Homelab Infrastructure** | *Raspberry Pi, Traefik, Authentik, Tailscale* — Infrastructure-as-code homelab with SSO, reverse proxy, mesh networking, and automated Restic backups.
- Spotify Now Playing API** | *Cloudflare Workers, OAuth2* — Lightweight proxy for Spotify's Currently Playing API with automatic OAuth token refresh.
- TypedByMe Portfolio** | *Hugo, GitHub Actions* — Personal portfolio and technical blog with automated static-site builds and continuous deployment.

Education & Certification

B.E., Computer Science and Engineering

2013 – 2017

Visvesvaraya Technological University

India

AWS Certified Solutions Architect – Associate (2023)
